

In the framework of NO-FEAR project UCSC is working on trauma management as **WP 3 – acute care of the patient** leader.

Recently UCSC expert staff attended two recent international updates: Congresses Trauma oggi (Rome, November 2022) and Trauma Update - Trauma Management in Hostile Environments (Milan, December 2022) and would like to share with you some of the most relevant information.

UCSC prepared and selected a serie of statements **on trauma management on the field** based on those two Congresses with **two main objectives**:

- provide you relevant informations on the cutting edge topics in trauma care
- obtain your opinion on the relevance of what is reported

The form is open to various stakeholders in the framework of emergency medical services including doctors, nurses, EMS technicians and those who are working in the pre-hospital phase.

Topics included in the form are

1. Compressible hemorrhages;
2. Non-compressible hemorrhages;
3. Blood, transfusion;
4. Hemodynamics & trauma instability;
5. Hemodynamic monitoring;
6. Triage;
7. Timing and treatment;

You can access the form through this link: <https://forms.office.com/e/ihkntMHu3f>

Many thanks for you support.
